

StegoShard

How to restore this vault

These pages hold an encrypted file, encoded as error-corrected QR images.

1. Get StegoShard (browser extension or CLI) or the Python reference decoder from the project page below.
2. Scan or photograph every page, then import the image files (or the PDF).
3. Enter your password. The original file is restored.

You can lose or damage a few pages and still restore, as long as most survive.

Project and reference decoder:

<https://github.com/dlamarre-dev/StegoShard>

Key location:

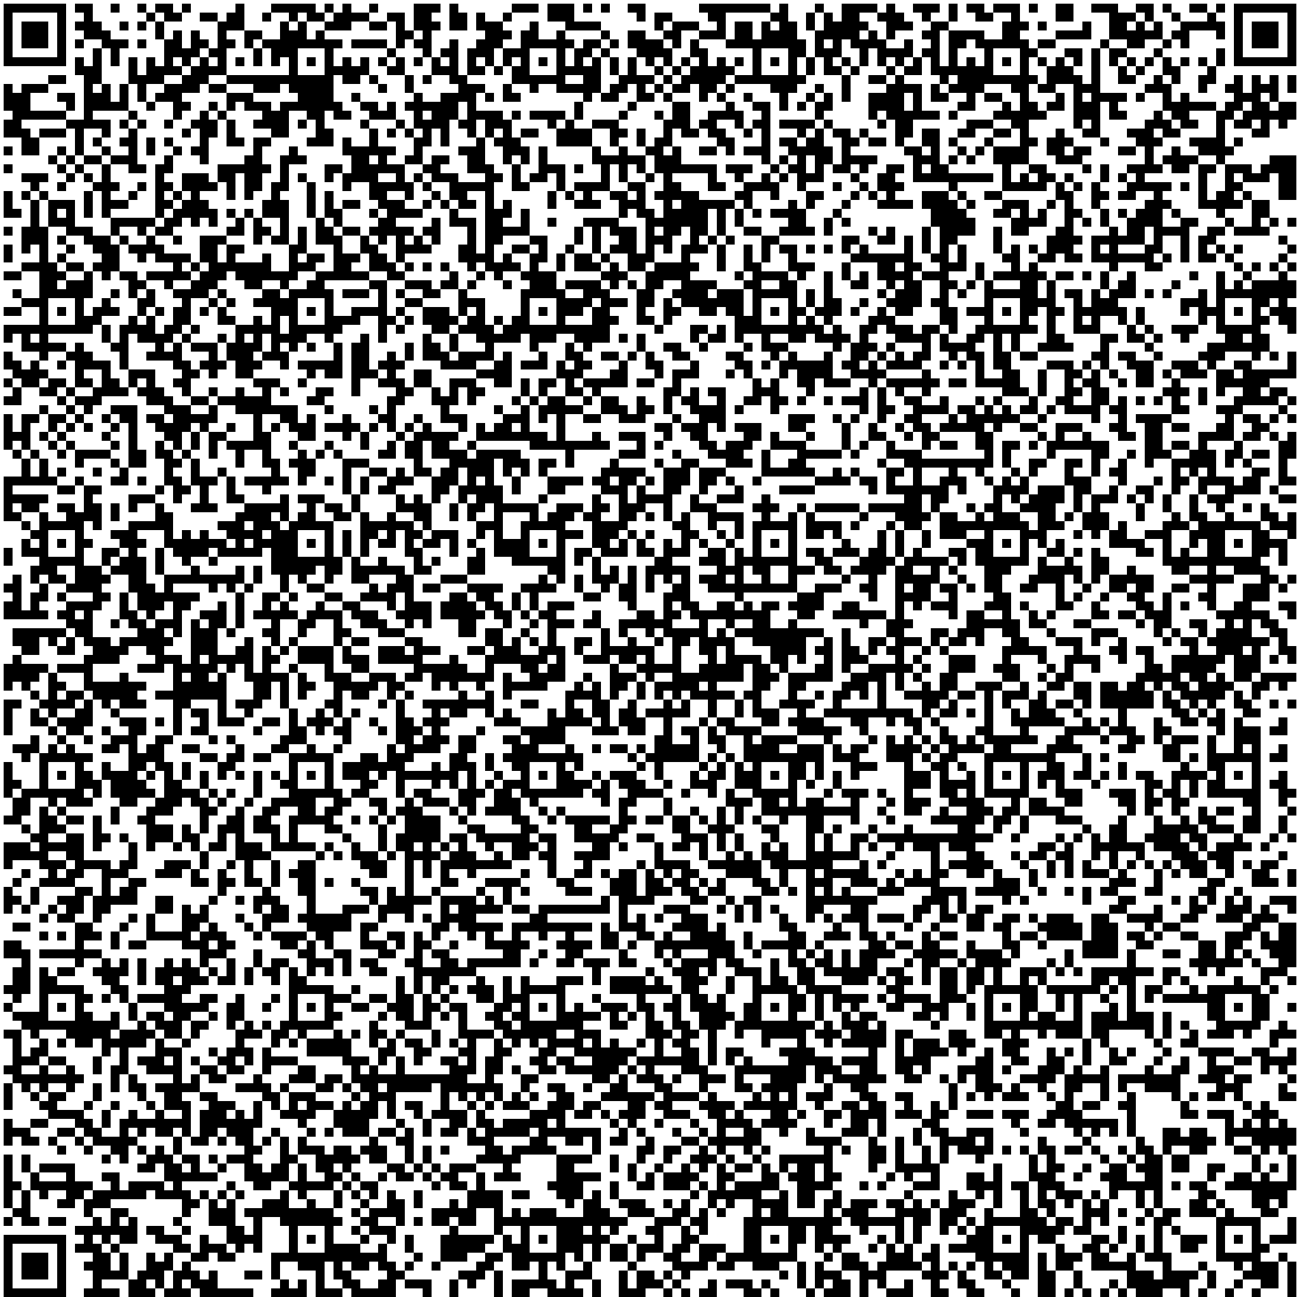

Password hint:

Keep it safe: print with a laser printer, store away from light and moisture, and keep copies in separate places.

This sheet is not encrypted. Never write your password here.

WALLET BACKUP

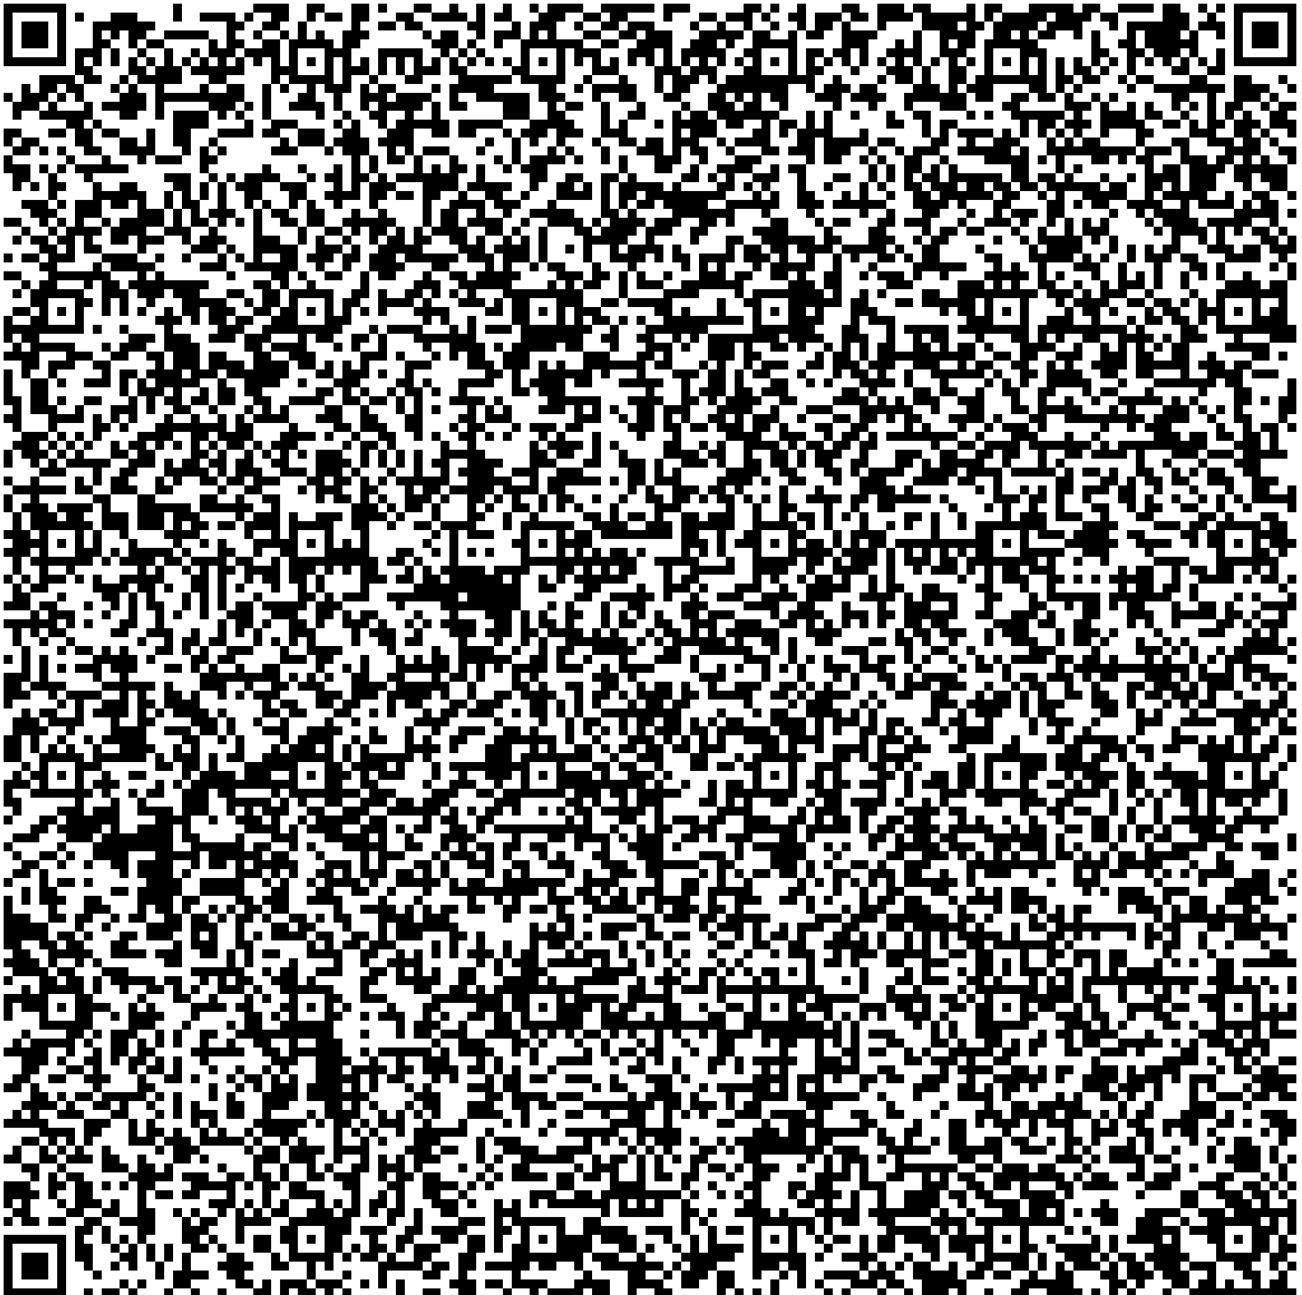

2026-08-02 Page 1 / 3

Restore: StegoShard + your password, with enough pages.
<https://github.com/dlamarre-dev/StegoShard>

WALLET BACKUP

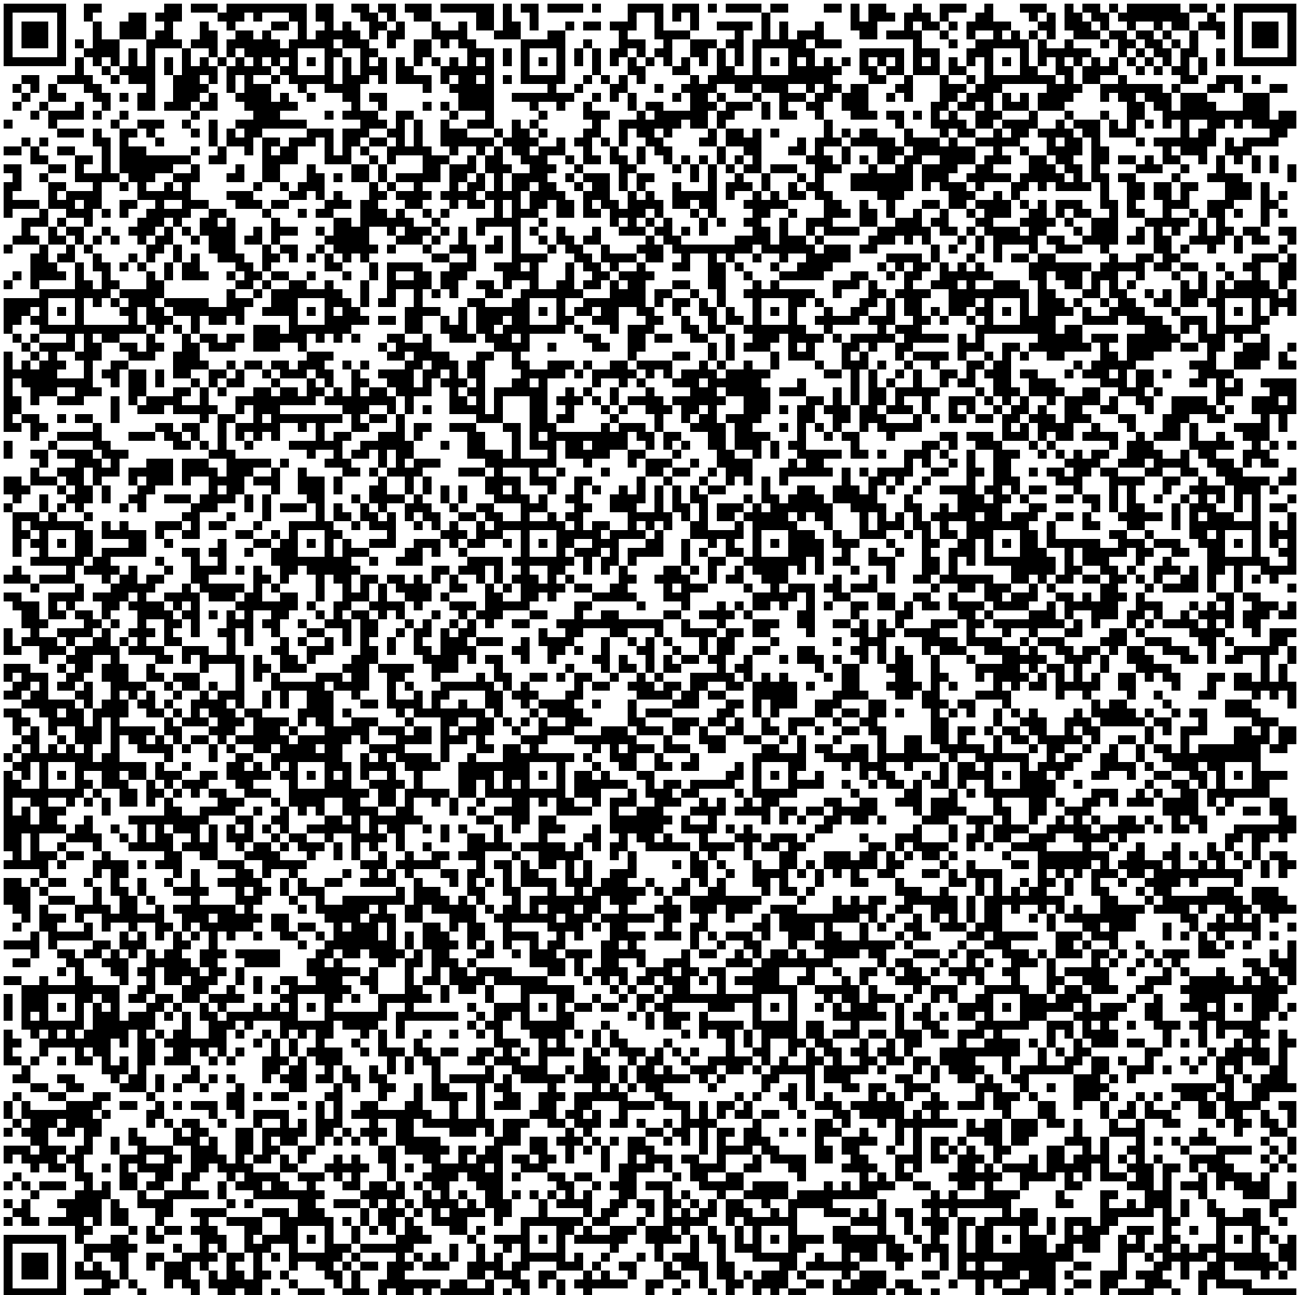

2026-08-02 Page 2 / 3

Restore: StegoShard + your password, with enough pages.
